## EXPERIENCE

### **Ellation (Crunchyroll), Inc., San Francisco, CA** - *Software Engineer*

AUG 2014 - FEB 2017

- Built and launched [vrv.co](http://vrv.co) in 4 months on new tech stack (Express / Universal React / Redux)
- Implemented in-modal navigational flow, promise chains, and error handling for Upsell, Subscription, and Checkout views
- Collaborated with API teams (CORE, CMS, Payments) on API issues e.g. bugs, data
- Worked with tech lead to architect SASS organization and mobile-first responsive design
- Collaborated with designer to create and maintain [vrv.co](http://vrv.co) Design page, to facilitate consistent usages of typography / design elements
- Managed a team of offshore contractors, providing general support and ensuring adherence to coding standards and team process
- Implemented Simulcast Calendar feature, migrated legacy code to Symfony for [crunchyroll.com](http://crunchyroll.com)
- Wrote unit / integration tests for React / Express and Symfony services
- Full-stack development on Crunchyroll's LAMP (Linux, Apache, MySQL, PHP / Symfony) stack

### **React Workshop, San Francisco, CA** - *Teacher*

OCT 2015 - MAR 2016

- Built curriculum for a full-day React workshop with co-instructor
- Taught approximately 100 students in 4 workshops

### **Satellite Station, Inc., Dublin, CA** - *Localization Specialist*

NOV 2010 - NOV 2013

- Translated software, web/mobile apps, IT equipment manuals, etc. (English <=> Japanese)
- Tested apps for translation/cosmetic errors and bugs, and logged them in Excel, JIRA, etc.

### **TSG USA, Inc., Peachtree City, GA** - *System Engineer*

JUN 2008 - JUL 2009

- Provided electrical design and test engineering services for Panasonic Automotive (PASA)
- Saved \$2,300,000 over 3 years for PASA/Toyota by managing LED cost reduction project

## EDUCATION

### **University of California, Irvine** - *B.S., Computer Engineering*
